A video was shown highlighting Portfolio Night, which was held at Discovery World on May 16, 2007. Mr. Mike Walsh noted the immediate challenges facing the partnership: parking for faculty and students, development of a budget, and buy-in from the faculty. The established goals for FY2008 are: development of new content for the pod prototype, construction of a major HIVE Pod, increase marketing efforts, transport HIVE experience to various public venues, expand MPTV presence through signage, partner with ECAM, short courses offered through OCL, co-productions with MPTV and find a way to connect with the MATC recruitment effort. Mr. Bromberg explained how MPTV has been connecting with Discovery World. Mr. Krajniak discussed the importance of the partnership between MATC and Discovery World and the benefits of the partnership to the community.

Director Baker acknowledged the great potential the partnership between MATC and Discovery World has for new and innovative programs as well as the broader view MATC will have in the marketplace. However, because of the large investment the board has contributed to Discovery World, it is very important to see students at
Discovery World learning and getting credit as part of classes and not just experiences. Director Baker requested the numbers of student usage at the facility be presented at a later date.
