

Health Occupations Division
RENAL DIALYSIS PROGRAM

The next step in the admissions process is a health examination and completion of the required forms listed below. Please return all signed forms to the MATC Health Records/Criminal Background Check/Petition Office in Room M240 at the Milwaukee Campus. The cost of the health examination and immunizations are your responsibility. You may be able to obtain health care services at your local Health Department.

Included in this packet are:

1. Health Certification Form. Please have your physician or health care provider complete and sign the enclosed Health Certification Form.
2. Information about Hepatitis B and its vaccine, and a Hepatitis B Release Form. Please read the information and discuss it with your physician or health care provider. Complete and sign the Hepatitis Release Form.
3. Information about the essential functions for your program. Please read the information. If you have questions, discuss it with your physician or health care provider. Complete and sign the Essential Functions Form.

All forms must be completed with authorized signatures.

Return the completed Health Certification Form, the Hepatitis B Release Form and the Essential Functions Form to the MATC Health Records/Criminal Background Check/Petition Office in Room M240 at the Milwaukee Campus. If you have any questions, please contact the Health Records/Criminal Background Check/Petition Office at 414-297-7871.

Be sure to keep a copy of your completed forms.

We look forward to working with you as you complete the required documentation for your program of interest at MATC.

HEALTH REQUIREMENTS CHECKLIST

- Check off as you complete each requirement for your own reference.
- Retain the completed list as program faculty may ask to see it at the beginning of a semester.

STUDENT NAME: _____ PROGRAM _____

TO DO:

- Caregiver Background Check** (Not required for Opticianary Science, Dental Hygiene, Dental Technician, most Dental Assisting students)
- Acknowledgment of Essential Functions-Functional Abilities Form**
- Health Certification Requirements**
 - 1) **Certification of student's good health by a physician or nurse practitioner**
 - 2) **Immunizations** (Not required for CNA , Dental Technician or Optician Science)
 - a) MMR immunizations **1 and 2** OR Rubella Titer AND
 - b) Rubeola immunization or titer AND
 - c) Chicken pox - Proof of having had chicken pox or chicken pox immunization per authorized medical signature OR Varicella titer
 - 3) **TB skin test, Step 1 and Step 2** (Not required for Dental Technician or Opticianry Science) (2 negative TB skin tests within 30 days of each other)
 - a) Chest x-ray, only if TB skin test was positive
 - 4) **Tetanus Shot**
 - 5) **Hepatitis B Release Form** - Signed and verifying Hepatitis B status
 - 6) **Hepatitis B immunization dates**
 - 7) **For Renal Dialysis Students Only:** Hepatitis B Antigen / Antibody
 - 8) **For Surgical Technology Students Only:** Eye Examination

TWO STEP MANTOUX TUBERCULIN SKIN TEST: This must be administered within one year of date of program entry or, if over one year, a ONE step update must be performed. Nursing Assistant Students must have skin test within 90 days of program beginning date.

PROCEDURE:

Step 1:

- 1). A Mantoux Tuberculin Skin Test of 0.1 (STU) PPD is administered to all individuals who have never had a two-step skin test or to those individuals who have not had a PPD within the last two years.
- 2). A health care professional must read the results within 48-72 hours.
 If positive, must follow- up with a chest x-ray.

Step 2

- 1). Repeat the test within 7 to 30 days after the application of the first dose using the same strength of PPD.
- 2). A health professional must read the results within 48-72 hours.
 If positive, must follow-up with a chest x-ray.
 If negative, repeat (Step 1only) each year.

REPORTING RESULTS

4. Step 1 Results

INFORMATION ABOUT HEPATITIS B VACCINES

THIS GENERAL INFORMATION IS PROVIDED AS A COURTESY AND MATC MAKES NO REPRESENTATION AS TO IT'S ACCURACY. YOU SHOULD CONSULT YOUR PHYSICIAN FOR ALL MEDICAL INFORMATION REGARDING THE MATTERS GENERALLY DESCRIBED HERE.

The Disease and the Risks

Hepatitis B is a viral infection caused by the Hepatitis B virus (HBV) which causes death in 1-2% of patients. Most people with Hepatitis B recover completely, but approximately 2-10% become chronic carriers of the virus. Most of these people have no symptoms, but can continue to transmit the disease to others. Some may develop chronic active hepatitis and cirrhosis. HBV also appears to be a causative factor in the development of liver cancer. Thus, immunization against Hepatitis B can prevent acute hepatitis and also reduce sickness and death from chronic active hepatitis, cirrhosis and liver cancer.

Risk of Exposure

Medical and paramedical personnel are at increased risk of contracting hepatitis depending upon their degree of exposure to the blood or body fluids (e.g. saliva, feces, sweat, vaginal secretions, respiratory secretions and other body secretions) of patient infected with Hepatitis B (known or unknown). Hepatitis B is spread by direct contact of broken skin or mucous membranes with the blood or body fluids of a person who has Hepatitis B or is a carrier of the disease. Routine or frequent handling of blood or contaminated tissue products, therefore, constitutes significant risk because of the ease of transmission of the disease and the fact that many people with Hepatitis B have no symptoms and do not know they have the disease.

The first line of defense against Hepatitis B is the Hepatitis B vaccine. Immunization with Hepatitis B vaccine is the most effective method of preventing HBV infection.

The Vaccine

The Hepatitis B vaccine (Engerix B, Recombivax HB) is produced using recombinant DNA technology. The vaccine works by stimulating the immune system to produce antibodies to the virus.

The vaccine is given intramuscularly in the deltoid in three doses. The second dose one month after the first, and the third dose six- twelve months after the first. After vaccination, more than 90% of healthy adults develop protective antibodies. The cost is \$150.00 for the series. Only minor adverse reactions have been reported with vaccination, including transient fever and soreness at the injection site, rash, nausea joint pain and mild fatigue have also been reported. The vaccine is not contraindicated in pregnancy.

RELEASE FORM: HEPATITIS B

1.

Please read thoroughly and check the appropriate box.

I have received and read the information regarding Hepatitis B and the vaccines that are available.

As a student, I understand that due to my occupational exposure to blood or other potentially infectious materials I may be at risk of acquiring Hepatitis B Virus (HBV) infection. I have been advised to be vaccinated with Hepatitis B vaccine. However, I decline Hepatitis B vaccination at this time. I understand that by declining this vaccine, I continue to be at risk of acquiring Hepatitis B, a serious disease. If in the future I continue to have occupational exposure to blood or other potentially infectious materials and I want to be vaccinated with Hepatitis B vaccine, I can pursue the vaccination series.

I hereby release Milwaukee Area Technical College, its Board Members, and personnel, and any clinical facility at which I train from any liability for any consequences to me or any claims arising out of or related to my decision to be or not to be vaccinated. I hereby agree to indemnify all of the above persons and organizations for any and all claims, including the attorneys' fees and costs, which may be brought against any one of them by anyone claiming to have been injured as a result of any injury which may occur as a result of my decision.

OR

I do not wish to decline the Hepatitis B vaccine. I am currently in the process/or have completed the series. I understand that full immunity requires three doses of vaccine over a six-month period.

Student signature required _____ Signature of Student _____ Date _____

2.

Return this form to the Health Center as soon as possible with any information listed. Please have authorized medical signature if you have had any dosages.

IF HBV given:

1st Dose Date: _____ Authorized Medical Signature _____

2nd Dose Date: _____ Authorized Medical Signature _____

3rd Dose Date: _____ Authorized Medical Signature _____

Please Return this Form to:
MATC Health Center (Room M240)
700 West State Street
Milwaukee WI 53233

TO: RENAL DIALYSIS TECHNICIAN PROGRAM APPLICANTS

RE: Hepatitis B VIRUS (HBV) BLOOD TESTING

Renal Dialysis Technicians work in areas that are considered to be "high-risk" exposure areas for blood-borne pathogens (disease-producing germs). One such pathogen, the Hepatitis B Virus, is a major concern for dialysis staff members and patients because it is easily transmitted in the blood.

Current practices in dialysis requires that **ALL** persons who perform dialysis therapy must be free of the Hepatitis B Virus, either in the active infectious state or the chronic carrier state. This practice will require **periodic blood testing** of the MATC dialysis technician student during the educational/clinical program year. **Please be advised that any student who currently has a Hepatitis B Virus infection, or who is a carrier of the Hepatitis B Virus is NOT permitted to work with renal dialysis patients.**

Laboratory studies of the student's blood will be required for verification of the Hepatitis B Virus status. To satisfy current practices, this laboratory test must be performed AFTER June 1st of the enrollment year, and *may* need to be repeated AFTER January 1st. (You will be notified of this need in December by the program coordinator) This laboratory test can be done at various locations. Some suggestions are listed below.

While immunization is NOT a program requirement, MATC **strongly recommends** that the student be immunized against the Hepatitis B Virus (the virus which causes hepatitis) since the student is frequently exposed to blood. The vaccine consists of a series of 3 injections given into the arm at specified time intervals, and is 80-90% effective in producing immunity against the Hepatitis B Virus. Please discuss this recommendation with your physician. Sources for the vaccinations are listed below.

If you have any questions regarding this requirement for admission, please contact Judy Theune, Coordinator of the Renal Dialysis Technician Program, at 414-297-6728, or Ms. Lucia Francis, Associate Dean of Health Occupations Division at 414-297-8569.

HEPATITIS TESTING:

Hepatitis B Virus testing can be done at many locations. The cost of the test averages \$60-\$70 for a combined Hepatitis B Virus Surface Antigen and Antibody blood test. Please check your insurance coverage since some policies may cover partial payment. Several suggested locations are listed below:

Your private physician or laboratory.

Public health departments.

See the yellow pages under "Laboratories" - call these locations for cost estimates, hours, and services available.

IMMUNIZATIONS:

Hepatitis B Immunizations can also be done at various locations. The series of 3-injections cost approximately \$45-\$65 per injection. Please check your insurance policy since some policies will cover this cost in part or in full. Several suggested locations are listed below:

Your private physician.

The public health department in your community.

City hall.

Renal Dialysis Technician Program

VERIFICATION OF HEPATITIS B VIRUS (HBV) STATUS: Blood Test Results

I, _____ (Student name) and ID # _____ have had a Hepatitis B Virus blood test per requirement of the MATC Dialysis Technician Program. This test is a combined HBV antigen and antibody test, and was performed **AFTER June 1** of the program's admitting year. The results of the tests are:

The results of the *HBV Antigen* Test are: (check one, please)

The student tests **Negative** for **Hepatitis B Surface Antigen.**

The student tests **Positive** for **Hepatitis B Surface Antigen.**

AND

The results of the *HBV Antibody* Test are: (check one, please)

The student tests **Negative** for **Hepatitis B Virus Surface Antibody.**

The student tests **Positive** for **Hepatitis B Virus Surface Antibody.**

Please include copy of the lab report with this form.

These tests were performed on (date) _____
