

HVAC2-125: Control Application and Circuits

Minimum Qualifications: 2 years industry experience verifiable through employment history and EPA Type II or EPA Universal 608.

A performance exam would be administered by one of the HVAC/R department faculty in the HVAC/R Department of the Oak Creek campus during the instructor's normally scheduled on campus time. A study guide would be provided one week in advance of the exams if the applicant chooses to request one. The student will have 2 hours to complete the written examination and 2 hours for the practical portion.

Student taking written exam must complete at or above 80% for consideration. This would be considered a "one time" application process. Minimum qualifications must be demonstrated in the first attempt.

Testing Coordinators:

Glen Schmidt
Department Chair
Instructor Air Cond, Refrig, and Heating
414-571-4771
Schmidg5@matc.edu

Debra Richards
Instructional Chair
Instructor Air Cond. and Refrig. Tech
