EPROD-153: eProduction Practicum 1

Course Description:

Students prepare for employment in the eProduction field by gaining practical, real-world experience in a professional environment. The fundamentals of teamwork, strategic planning, organization, and the creative applications of technology are emphasized. Students work on special projects either in the community or embedded within MPTV that allow them to practice their abilities to tell stories and engage audiences in a digital environment.

Total Credits: 3.00

Course Competencies

1. Identify a project of interest in the digital media field
2. Create a preproduction plan
3. Explore methods of acquisition
4. Demonstrate best practices of audio/video acquisition
5. Identify methods of creating a final product
6. Define elements of a producer/client relationship
