

Milwaukee Area Technical College
Information Technology – Fire Suppression System Training

I have received training in the purpose and operation of the Central Computing Facility Fire Suppression System (located in Room C363). I am aware of the potential danger should I be in the Central Computing Facilities when the Fire Suppression System is activated.

I have been trained in how to temporarily halt the discharge of the Fire Suppression System if necessary. I know who to call if I have temporarily halted the discharge of the Fire Suppression System.
